Maths and Science Education

Mathematics and Science are foundational pillars of modern education, critical for understanding and navigating the world around us. These subjects develop problem -solving skills, critical thinking and an analytical mind-set, which are essential in various fields and everyday life. At UNATTI KANYA VIDYALAYA, committed to provide high-quality education in Mathematics and Science through-

1. Interactive learning:- We engage students in such lessons that make complex concepts easy to understand by relating them to day today life examples. Learning through experiments in science as well as Mathematics labs. For the enhancement in learning we use digital tools and multimedia resources.

2. Comprehensive and Integrated syllabus:- Well structured syllabus aligned with CBSE guidelines which emphasis on Conceptual clarity and application based learning. Integration

of real-world. Examples to make learning relevant and exciting. Maths and Science labs nurture talent and fosters curiosity. Competitions, quizzes and exhibitions through these clubs encourage creative thinking and innovation
